

System House

The monthly review of the financial performance of the UK computing services industry
Index 1995 and 1996 Available by subscription only ISSN 0967-2583

Company Index

January 1995 to December 1996

Many *System House* subscribers keep all the back issues in order to build a library on the financial performance of companies operating in the UK software and computing services industry.

This third index covers all mentions of companies in *System House* between the issues dated January 1995 and December 1996.

The most detailed reviews of company performance are when we review full year results. These reviews and reviews of interim results are shown in separate columns.

We also index all other mentions of substance. Many of these will be as a result of acquisitions or special corporate events like new issues, profits warnings or, unfortunately, receiverships.

We hope you continue to find the index of value.
