

# Coding Messages

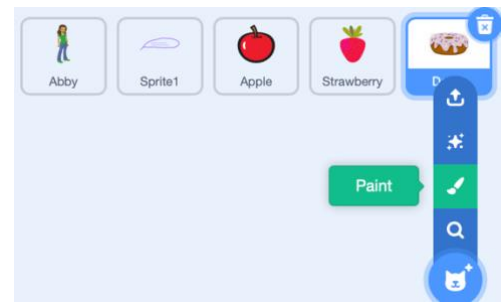

Task: Code a secret message for a friend.

Make a mini quiz to see how well your friends know you. If they click on the correct answer they will hear the secret message!

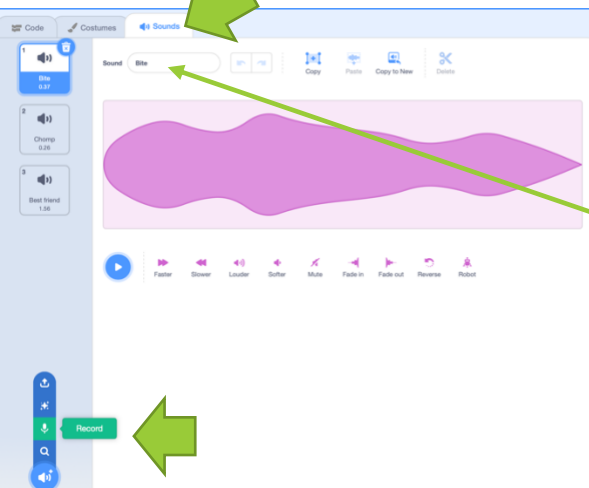

1. Add your sprites. You need a person and your three options. E.g. what is my favourite food? 3 food items.

2. Draw a speech bubble with some text in it. E.g. Click on my favourite food to reveal the secret message.

3. Record the secret message for each sprite. Rename here.

4. Drag these blocks into place. Remember to change the sound using the arrow.
